

WE

**ZEROS**

ASSURE

SAFETY

- At ZEROS, we are dedicated to ensuring that every part of the train and railway is safe and reliable.
- Why does this matter? Because safety isn't just important—it's essential!
- Our mission is to help avoid accidents and ensure that trains run smoothly.
- Our testing services help you feel confident by finding potential problems before they happen

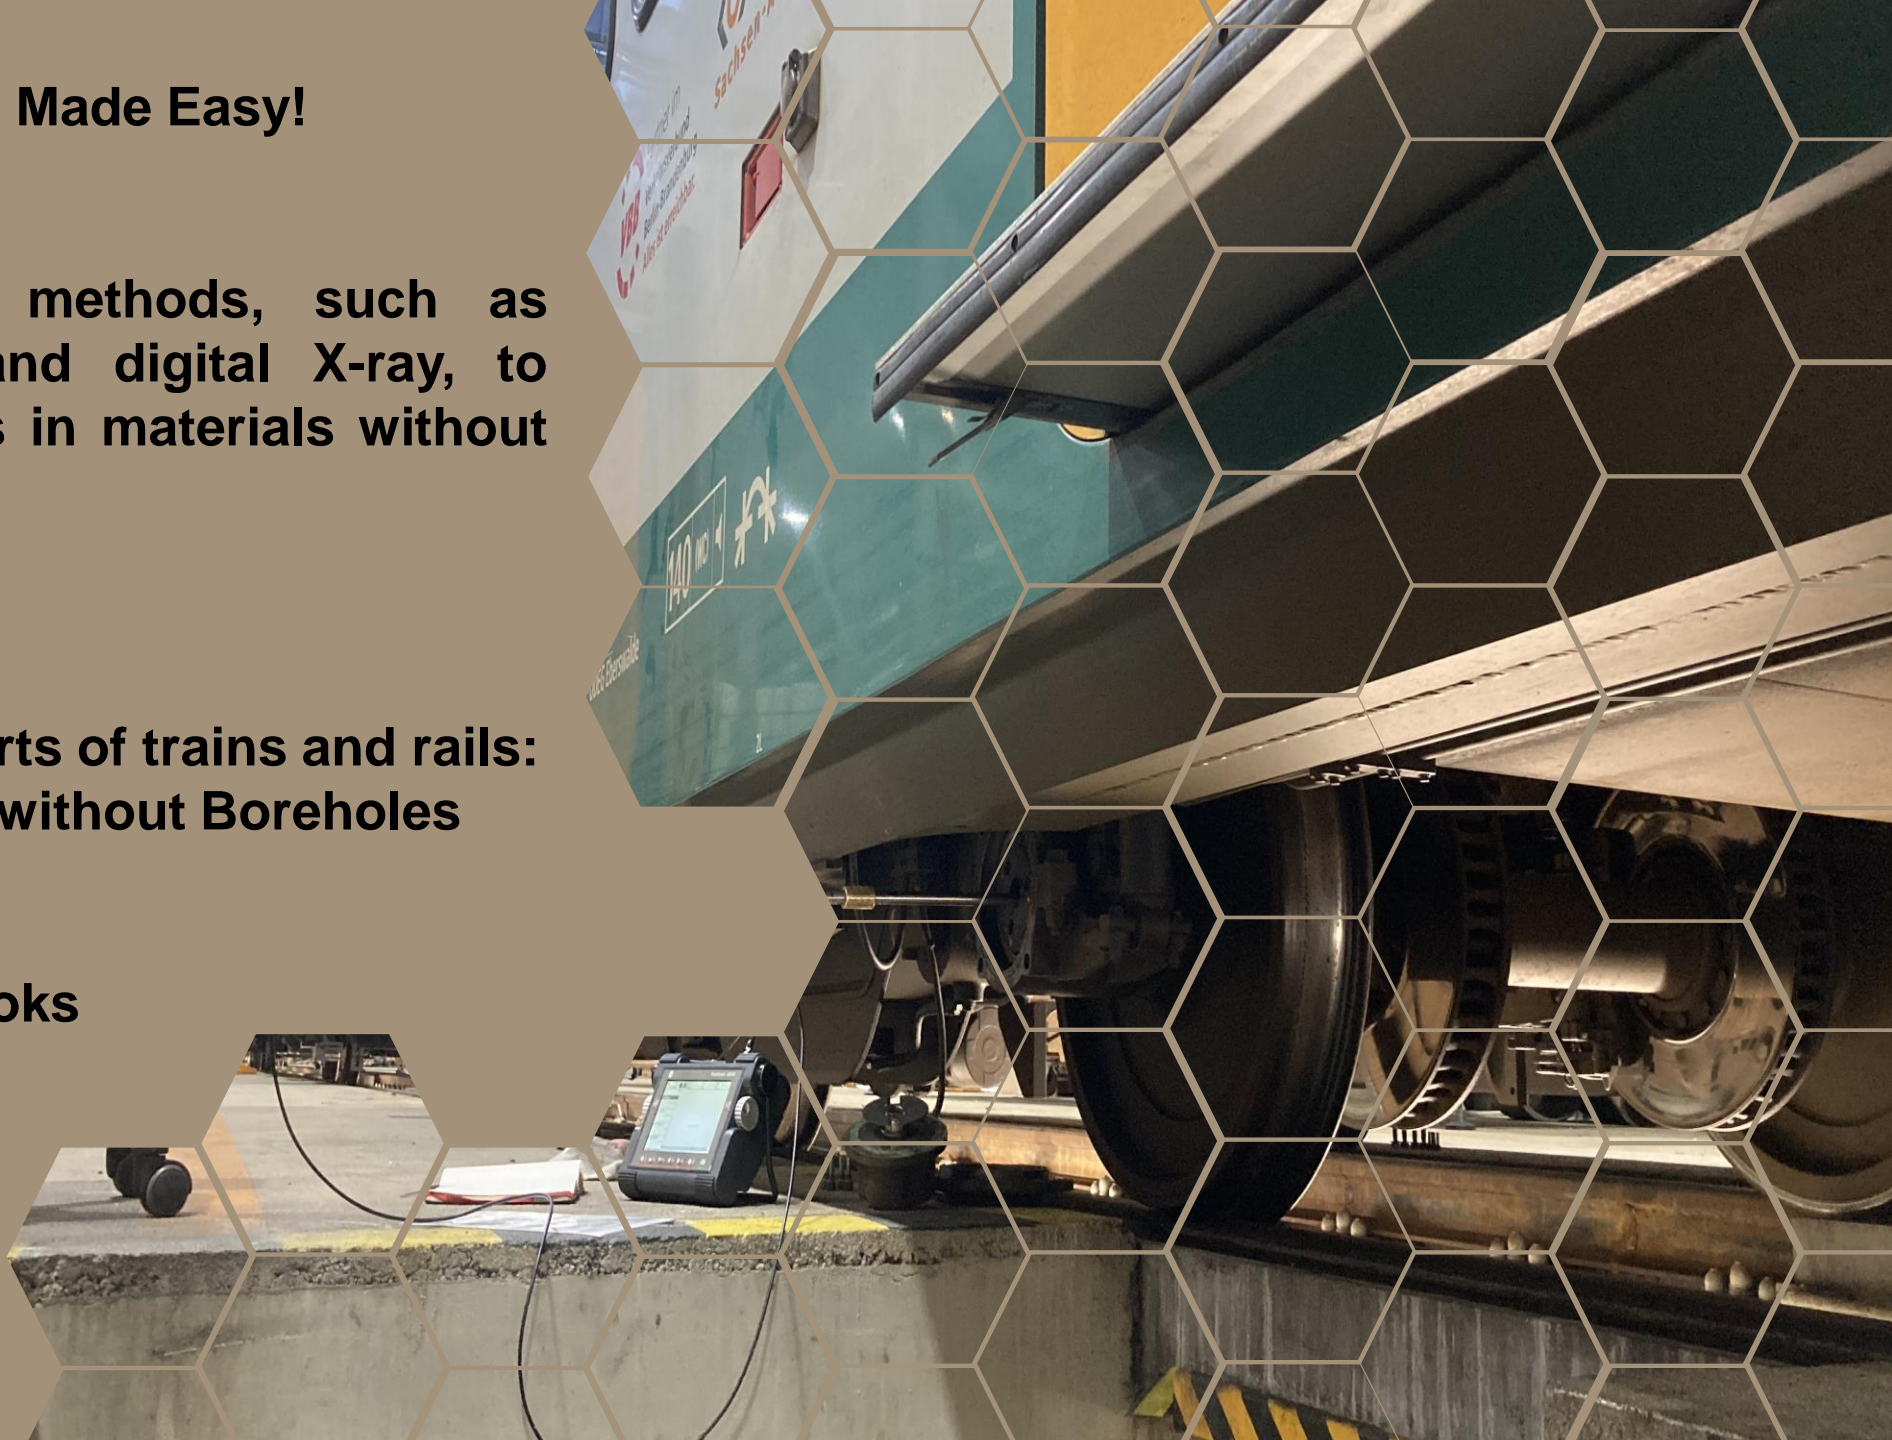

## **Non-Destructive Testing Made Easy!**

- We use advanced methods, such as ultrasound, X-ray, and digital X-ray, to detect hidden issues in materials without causing any damage.

### **We focus on specific parts of trains and rails:**

- Axle Shafts with and without Boreholes
- Axle Wheels
- Bogie Frames
- Buffers and Draw Hooks
- Superstructure

- **With our ISO/IEC 17025 accreditation, you can trust that our testing methods are reliable and precise.**
- **We don't just follow industry regulations—we anticipate challenges and create smart solutions. And we do it quickly and flexibly.**
- **At ZEROS, we bring years of expertise in railway materials testing, ensuring your components are in the best hands.**
- **Our skilled professionals are qualified under ISO 9712 specifically for the railway sector.**
- **As NDT competence center, we assist you according to the ECM framework, handling NDT tasks, workshop audits, and technical employee training.**

**Let's Work  
Together for Safer  
Railways!**
