

re:place it!

The new, healthy  
building material  
— ready for Europe.

von Hanf<sup>®</sup>

## WHY WE ARE HERE

Europe needs  
CO<sub>2</sub>-negative,  
healthy building  
materials.

Hemp is  
the answer.

## WHO WE ARE

Building materials company

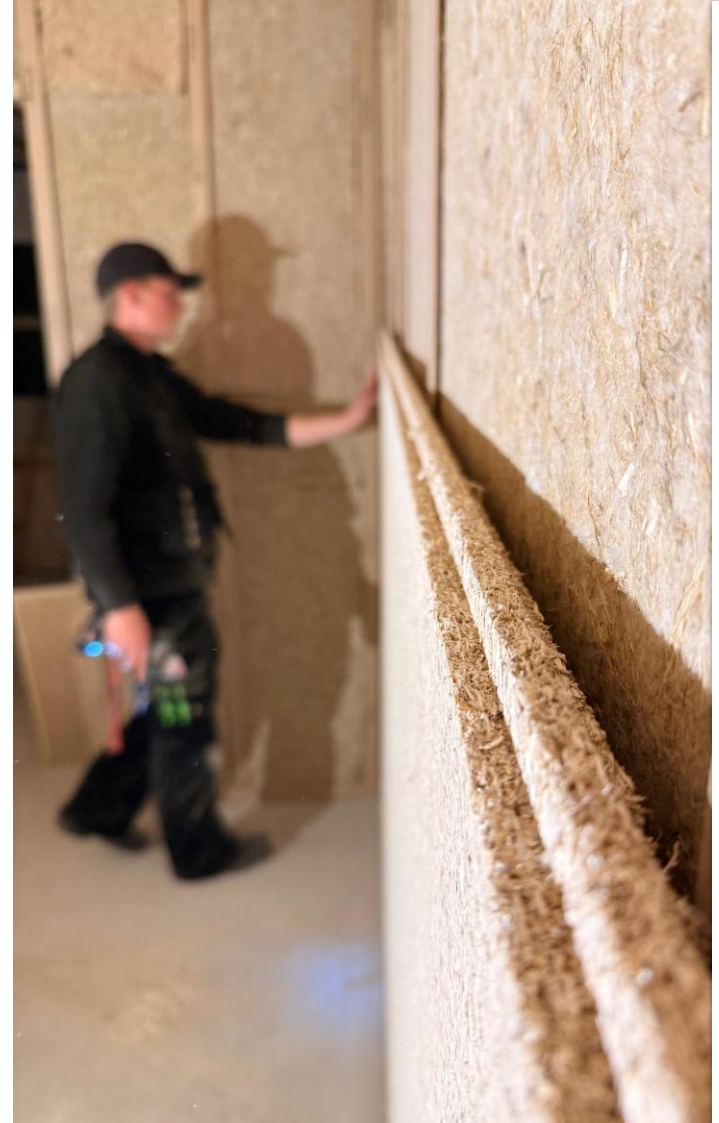

from Northern Germany

MISSION

CO<sup>2</sup> negative construction.

FOCUS

lightweight, healthy,  
bio-based materials.

## OUR PRODUCT FAMILY

Structural boards

Insulation/

lightweightboards

Massive buildings  
elements

Acoustics

Hemplith Drywall

Hemplith Mineralboard

Hemplith Aquaboard

Hemplith Therm,

Hemplith Flex

Hemplith Fill

Hemplith Blocks

Silentlith Acoustic Pro

## WHY HEMP?

Hemp grows every year, without pesticides and with extremely high biomass. It captures CO<sup>2</sup> and stores it permanently in the building. Our materials are circular, vapour-open and free from harmful substances.

They don't just  
improve buildings  
— they improve  
the air we breathe.

# ESG & CO<sup>2</sup>

- CO<sup>2</sup> storage inside the building.
- Improved ESG ratings.
- Future-proof under EU regulations.

## EUROPE IS READY

- New EU construction product rules.
- Funding programs

Rising demand  
for sustainable  
construction.

# INVITATION

We seek partners,  
pilot projects  
and distribution.
